I. INTRODUCTION

A completed statewide Birth-5 Needs Assessment is required by the Federal funder before DCDEE may begin some PDG activities during 2019. One component of the Needs Assessment is assessing data needs across the ECE mixed delivery system. By 6/20/19, the Contractor will gather information on publicly available ECE data that are critical to 1) execute NC's long-term vision to improve outcomes for children, 2) measure the number of unduplicated children served by programs, and 3) understand unmet service needs. A particular focus is on vulnerable children. The Contractor will share this information to be included in the statewide Birth-5 Needs Assessment report written by another DCDEE contractor.

II. BACKGROUND

PDG B-5 grants were issued to states in order to facilitate collaboration among early childhood care and education (ECE) programs to better serve children and families. The PDB B-5 Funding Opportunity Announcement describes the purpose of the grant as follows:

“In summary, the PDG B-5 grants will support States in their efforts to analyze the current landscape of their ECE mixed delivery system and implement changes to the system that maximize the availability of high-quality early childhood care and education options for low-income and disadvantaged families across providers and partners, improve the quality of care, streamline administrative infrastructure, and improve State-level early childhood care and education funding efficiencies. “
(https://ami.grantsolutions.gov/files/HHS-2018-ACF-OCC-TP-1379_0.pdf)

The PDG requires five major activities, and DCDEE has planned for various strategies to implement each one.

1. Conduct a B-5 Needs Assessment to inform the state's ongoing planning to strengthen the early childhood system.
2. Develop a state Strategic Plan to ensure the state's early childhood system best meets the needs of young children, especially those who are most vulnerable.
3. Implement family engagement activities to maximize parent knowledge and choice.
4. Implement strategies to share best practices in the areas of universal enrollment, children's transition from preschool to kindergarten, and in aligning data across ECE programs.
5. Increase access to high quality infant and toddler care through the NC Babies First (NCB1) program.

This RFA relates to PDG Activity 1, in supplying information for the required Needs Assessment. Specific tasks are explained in the Scope of Services below. The dates below may need to be adjusted throughout the project, based on other grant work.

III. SCOPE OF SERVICES

The successful applicant will propose a timeline and budget for activities that specifically address the following:

- By 6/10/19, the Contractor will conduct a survey of key ECE data users to provide a summary describing what ECE public data is available by source to capture the unmet need of children to be served by NC programs. No Personally Identifiable Information (PII), or any sensitive or confidential information, from ECE programs will be collected or accessed by the Contractor as part of the survey process.
 - Entities surveyed should include state and local agencies, researchers, policy makers, teachers, and other members of the public.
 - The survey will pose key questions to understand and provide information on: 1) the primary state-level data sources used by ECE stakeholders today, 2) the purposes for which ECE data are currently used, 3) the current unmet data needs that ECE data users in NC continue to face.
 - Based on the results, the Contractor will describe and summarize the public data currently available (e.g., subsidy waitlist information in DCDEE database, survey of NC Pre-K providers about enrollment and capacity), identify gaps (e.g., home visiting data not currently included in the NC ECIDS) and make recommendations about next steps to fill the gaps.
 - By 6/26/19, the Contractor will submit a preliminary written report to DCDEE that summarizes data that is available and data that is needed, to be included in the statewide NA report.
- By 8/1/19 the Contractor will make recommendations about how these data can be incorporated into the expansion of the NC Early Childhood Integrated Data System (ECIDS). NC ECIDS serves as a single source for data integrated from multiple ECE programs and can provide unduplicated counts of the number of children served by a subset of education, health, and social services programs. The Contractor will start by describing data for programs not currently integrated into the NC ECIDS, identifying gaps, and making recommendations about data to add from these programs.
- By 10/1/19, the Contractor will identify data needs when considering whether NC is reaching intended outcomes as specified in the NC Early Childhood Action Plan (ECAP). The framework for the NC ECAP includes over 40 quantitative indicators that will be measured annually to track progress towards its 2025 goals to improve early childhood outcomes in NC. As such, reliable, high-quality, and readily-accessible data sources are needed to ensure that these indicators are accurately measured. Therefore, the Contractor will inventory the data sources available for NC ECAP indicators and identify any gaps that need to be addressed, emphasizing the identification of data sources for indicators focused on vulnerable children, such as those facing homelessness.

- By 11/1/19, the Contractor will propose formal recommendations for the state to consider in setting an aligned data strategy for the state across multiple ECE initiatives.
- By 12/30/19, the Contractor will submit a final written report on work completed.
- Throughout 2019, the Contractor will be guided by and communicate regularly with a Needs Assessment advisory group who will help refine the inventory work and help identify next steps to address various data gaps identified.
- Throughout 2019, the Contractor will participate in statewide planning efforts as requested by DCDEE to provide input based on findings of the inventory.
